

BE PREPARED

- Visit your primary care physician before leaving for school.
- Schedule doctor's visits during holiday breaks while at home.
- Select a doctor or healthcare facility you can visit at school.
- Have your digital medical records and insurance cards available.
- Create an emergency plan - inform a roommate, friend, or R.A. of how they can help you in an emergency situation.
- Have an emergency contact list.
- Keep a list of all the medications you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

For over 50 years, the National Headache Foundation has been focused on elevating the awareness of headache and migraine as a legitimate neurologic disease.

Migraine University© provides valuable resources for students, educators, and administrators navigating headache and migraine disease during their campus experience.

THE PROCESS

The Individuals with Disabilities Education Act (IDEA), which governs special education services in K-12, does not extend to colleges. Therefore, IEPs/504 Plans essentially "expire" after high school.

Instead colleges usually issue a Letter of Accommodation (LOA) created by their disability services office, which students must provide to their professors. The process, document names and accommodations may vary by college.

ACCOMMODATIONS

- Extended time to complete exams.
- Access to an alternate testing space (quiet environment with non-fluorescent lighting).
- Extended time to complete assignments.
- Ability to participate in classes remotely.
- Ability to take medication and have access to water during class.
- A fragrance-free environment.
- Excused absences due to migraine attacks.
- Ability to wear sunglasses or tinted glasses in class.
- Ability to wear earplugs or headphones in class.
- Ability to leave the class during a migraine attack.
- Select seating near an exit in case you have to leave suddenly.
- Note-taking service during absences or visual disturbances.

National Headache Foundation

More than 2.3 million U.S. college students are living with migraine and headache disorders

TRIGGERS ON CAMPUS

Eyestrain

- Studying for long periods of time can cause eyestrain. Take frequent breaks to give your eyes a rest.
- Use "night mode" on your devices or download light filtering apps for your phone and computer.
- Consider getting blue light blocking glasses or installing an antiglare screen on your monitor.
- Opt for more natural light and avoid/remove fluorescent lights.
- Look away from your screen at least once every 20 minutes to let your eyes rest.

Diet

- Determine if you have any dietary triggers.
- Elimination diets are an excellent way to identify problematic foods. Exclude one food item at a time and carefully track the results in a migraine diary. Download a free migraine diary at headaches.org
- Hunger: Eat three meals a day and have healthy snacks available for a quick bite between classes.
- Dehydration: Stay hydrated, drink plenty of water. Invest in a reusable water bottle.
- Caffeine and Alcohol: Drink coffee and alcohol in moderation.

Sleep Schedule

- It can be very difficult maintaining a regular sleep schedule in college, but disruptions to sleep patterns may cause migraine attacks.
- Try to get 7-9 hours of uninterrupted sleep per night.
